REPORT.

To the Honorable the Senate and House of Representatives of the State of Louisiana, in General Assembly convened :

The Administrators of the Charity Hospital of the City of New Orleans, beg leave to submit to your consideration, the following statement of their affairs :

The number of patients admitted into the hospital	
during the year 1859, was.....	12,775
Of which were discharged.....	11,257
Died.....	1,321

A reference to our former reports will show that there is a large annual increase in the number of patients to whom relief is administered by this institution. The number of patients received into the hospital, in 1858, exceeded that of 1857, by 2,440, and the number in 1859 exceeded that of 1858, by 1,438, though in the year 1858 a fatal epidemic prevailed during the summer months. This increase is attributable in part to the steady growth of the city of New Orleans, but mainly to the vast influx of a transient, and in part a pauper population, which the new avenues and increased facilities of travel have thrown upon us from other States of the Union.

The Administrators of the Hospital have considered themselves as the almoners of the State for the purpose of dispensing the beneficent aid of a large and noble charity to thousands who are the victims of accident, disease and decay. No object more deserving of careful consideration could engage the attention of a legislative body, and it is with pride that the people of the State point to this enduring monument of charity, which extends relief to the sick and afflicted from every State in the Union, and from every nation in Europe.

From the statement of the Finance Committee (hereto annexed) it will be perceived that the balance in the hands of the Treasurer, at the commencement of the year 1859, was \$2,192 80. There has been received during the year, from various sources, \$76,512 94, making a total of \$78,705 74.

The disbursements during the year 1859, were....	\$76,875 94
Balance on hand, 1st January, 1860.....	1,829 80

Of the amount disbursed in the year 1859, \$21,000 was appropriated to the payment of pre-existing obligations, and on the 1st February, 1860,

there will be due upon contracts for annual supplies, such as bread, meat, drugs, fuel, etc., etc., the sum of \$20,000.

To supply the necessary wants of this State institution, reliance must be placed principally upon direct aid from the State Treasury. A large, and indeed our principal source of revenue in former years, was derived from the tax on emigrants from foreign countries; but owing to causes upon which it would be foreign to the object of this Report to enlarge, a source of revenue which formerly yielded over \$76,000, now furnishes but \$14,000. The tax on balls and theatres, owing to municipal regulations, doubtless proper in themselves, now yields only \$3,970. 25. Other sources of revenue have been diverted by legislation to the support of objects which, however worthy in themselves, certainly do not present more urgent claims to support than the Hospital.

We therefore confidently look to the Legislature to extend the same liberal hand to the support of this institution which has characterized its action in former years, especially as extensive repairs will be required during the course of the current year to keep the buildings in such order as may prevent decay. It is to be remarked, moreover, that the want of an alms-house in this city throws upon this institution a burden which does not come properly within the objects for which it was established. Patients who have been cured are no longer fit inmates of a hospital, but until they have acquired strength to labor for a support, humanity forbids that they should be exposed to that starvation which is worse than disease; and yet a large portion of the inmates of the Hospital consists of invalids who have been cured of disease, but who have not acquired strength to labor. Efforts are now being made in this city to establish an alms-house, which it is hoped will relieve the Hospital of this class of inmates. In the meantime, however, the incumbrance rests upon the Hospital, a heavy tax upon its resources. In view of the foregoing facts, we respectfully ask that an appropriation not less than \$50,000 be made for the support of this institution during the current year.

We invite such members of your honorable body as can make it convenient to visit this institution, and to examine its condition; fully assured that you cannot better appreciate the vast amount of relief it annually dispenses to the most helpless and suffering portion of our fellow-beings than by a personal inspection of its various departments.

Respectfully submitted,

J. N. LEA,

Vice-President of the Board of Administrators.

STATEMENT "F,"

EXPENDITURES OF THE CHARITY HOSPITAL, FOR 1859.

January 1.	Paid A. Williams, for cleaning privies..	\$ 16 00	
	" N. Flynn, for cleaning chimneys ..	14 25
